WORK EXPERIENCE

Frontend Developer

Didmazaj   2024 – Present

- Developed several landing pages for didmazaj online store, utilizing HTML, SCSS, and JavaScript to create responsive and visually appealing designs.
- Used Webpack and Gulp for asset bundling and task automation, improving build efficiency and reducing page load times.
- Transpiled JavaScript with Babel to ensure compatibility with all major browsers and modern syntax support.
- Set up Google Analytics to track user interactions and provide insights for performance optimization.
- Integrated Telegram API to receive order notifications directly to a specified chat, improving order processing.

Intern Front End Developer

TP team | Course-Garden   12.2024 – 02.2025

- Worked in a team to integrate frontend functionality for course progress tracking.
- Developed and maintained user interfaces using React, TypeScript, and Vite, ensuring scalability and responsiveness.
- Styled components with TailwindCSS and Shadcn/ui, ensuring consistency across the platform.
- Documented components in Storybook for easier collaboration and reuse.
